The Learning Company®

Add Excitement to Your Curriculum with Award-Winning Software!

Reading/Language Arts

Reader Rabbit®1
Grades K-1
This classic includes four carefully sequenced games that help build fundamental skills required for beginning reading and spelling. Game play improves letter and word recognition, memory, and vocabulary. This program is customizable.

"Exemplary" – 1991 California Software Clearinghouse

Writer Rabbit®
Grades 2-4
Six sequenced games help develop writing and reading comprehension skills. Students learn sentence components and build up to higher writing levels. Teachers can use scoring system to track students' progress and customize the program for each student's ability.

"Best Language Arts Program" – 1990 Classroom Computer Learning Software Programs of the Decade

Reader Rabbit®2
Grades 1-3
Building on skills developed in *Reader Rabbit 1*, four sequenced games address fundamental reading skills including word building, long and short vowels, consonant blends, rhyming words, and vocabulary building.

Off-line activities provide ideas for integrating Reader Rabbit 2 with whole-language and ESL instruction

Writing & Publishing Tools

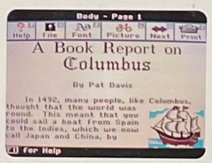
The Writing Center™
Grades 2 & up
Building on the most popular features of *The Children's Writing & Publishing Center*, this easy-to-use writing and publishing program enables students and teachers to design and produce high-impact documents including reports, newsletters, stories, signs, cards, calendars, and more.

Includes over 220 color pictures, spelling checker, and thesaurus – for the Macintosh only

The Bilingual Writing Center:™ Spanish/English
Grades 2 & up
This is the ideal program for classrooms with a bilingual or bicultural focus. This program has all the easy-to-use page layout and picture handling features of *The Writing Center* plus a menu selection that makes it easy to run the program in either Spanish or English.

Includes over 250 color pictures, spelling checker, thesaurus, and documentation in Spanish and English – for Macintosh only

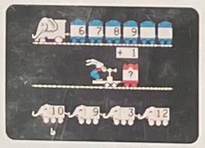
The Children's Writing & Publishing Center™
Grades 2 & up
An easy-to-use desktop publisher that opens a whole new world of communications for students and teachers. Students can produce beautifully illustrated reports, stories, and newsletters and teachers can produce a variety of creative classroom materials.



"Best Desktop Publishing Program" – 1990 Classroom Computer Learning Program of the Decade

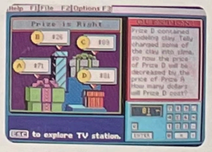
Math/Problem Solving

Math Rabbit®
Grades K-2
Four carefully developed games exercise early math skills while enriching a child's appreciation for numbers. Students explore basic number concepts, relationships, patterns, equalities, and inequalities. Teachers can customize math content and difficulty levels.



"Parent's Choice Award" – 1987 Parent's Choice Foundation

Super Solvers™ OutNumbered!™
Grades 3-6
An adventure program using word problems to build essential math, problem solving, and thinking skills, including addition, subtraction, multiplication, and division using colorful charts, graphs, and maps. Teachers can customize math content and difficulty levels.



"Best Elementary Education Program" 1990 Software Publishers Association

Most programs are available in School, Lab, Network, or Site License versions for Macintosh, IBM/Tandy and compatibles, or Apple II.
